Introduction and Background:

The Virginia Water Protection (VWP) Permit Program Manual (Manual) is a living document that undergoes periodic updates and revisions through a collaborative, internal process. The last partial revision occurred in 2006. The purpose of this guidance is to update the way in which procedures are implemented in the Virginia Water Protection Permit (VWP) Program, primarily due to amendments made to the VWP Program permit regulations, effective August 2, 2016, but also for various decisions made in processing VWP permits over the last ten years.

In keeping with DEQ initiatives on Pollution Prevention and digital government, the Manual will not be printed in hard copy but will be available electronically, as noted below ("Electronic Copy").

The following guidance was identified for official rescinding based on a comprehensive review of existing guidance and decisions made by the VWP Permit Program at a staff meeting held May 11, 2016. Therefore, *with the exception of GM11-2005*, this guidance supersedes the following Guidance Memoranda:
